

If you like the idea of "green power", EnviroWatts is for you.

EnviroWatts is our name for green power, energy generated from environmentally preferred, renewable resources such as biomass, sun, wind, water and geothermal springs.

Purchasing EnviroWatts

EnviroWatts can be purchased in 100 Kilowatt Hour Blocks. The average household uses about 1000 kWh per month, so you could purchase from 1 to 10 blocks. Each block will cost \$2.75 above your current cost per 100 kWh. For example, if you purchase 2 blocks, your bill will increase by \$5.50.

In order to purchase EnviroWatts, you must agree to purchase that amount for 1 year.

Ready to make a difference? Sign up now!

As an electric cooperative member, you have the power to make a difference in our energy policies. If you want to promote renewable energy, EnviroWatts is your opportunity.

To sign up for EnviroWatts, call your local Electric Cooperative branch office, or send in the attached reply card.

I want to participate in the EnviroWatts program using environmentally friendly energy sources. Please sign up my household for EnviroWatts!

I want to purchase _____ block(s) of EnviroWatts. I understand that each block will add \$2.75 to my monthly bill. I agree to purchase this amount for a period of 1 year.

Please cut out this sign-up sheet, fill it out and mail it in with your electric bill.
