AGREEMENT

The undersigned, hereinafter called the Applicant, hereby applies for a flat rate security light service with Salt River ECC, hereinafter called Salt River, upon the following terms and conditions:

- 1. The Applicant must be a member of Salt River.
2. The Applicant will pay a monthly flat rate fee, to be determined from time to time, in accordance with the Bylaws of Salt River and tariffs as filed with the Kentucky Public Service Commission.
3. A fuel adjustment charge will be added or credited to each individual lighting unit in accordance with the filed tariffs. The applicable fuel adjustment rate shall be applied according to the schedule below.
4. The security light must be located on an existing pole of Salt River that has the required voltage (120 volts) available. Should a pole(s) be necessary, an additional charge will be paid in advance to offset the costs associated with the labor and materials.
5. The contract for service shall continue for one (1) year from the date service is made available by Salt River to the Applicant, provided Applicant remains a member of Salt River and said security light contract is not transferred to another Applicant. After the one (1) year period, the monthly flat rate mentioned in Section B will continue or applicant may request a disconnect of the light.
6. Salt River will furnish and install the lighting unit complete with lamp fixture or lumens, control device, and mast arm. The rates for overhead service contemplate installation on an existing wood pole with service supplied from overhead circuits only. For underground lights, the rates assume that the light will be within an underground served subdivision or area.
7. Lamp replacements will be furnished and made by Salt River except in cases of vandalism or willful destruction. Service and maintenance for lights will only be performed during normal working hours.
8. Should the Applicant request the light be relocated, the Applicant will bear the cost of relocating the facilities.

Available Lighting

Table with 5 columns: Type, Description, Wattage, Monthly KWH, and Monthly Chg Per Lamp.
